

SynthFinder+

Lab Grown Diamond Detector

Member of **GJEPC** and **JMA**

SynthFinder+ easily separates **HPHT & CVD** Lab Grown Diamonds and Non-Diamonds such as **CZ & Moissanite** from a parcel of Loose Diamonds or Studded Jewellery. **SynthFinder Models** have features like **adjustable focus** and **auto marking** while also having portable options.

New Upgrade Reduces Refer Stones and Increases Accuracy.

Choose the most suitable model based on your application!
