

Easy-to-use Build preparation tool
for DLP/LCD/SLA printers

Standout features:

- Automatic mesh repair
- Auto / Manual supports
- Ultra-fast thickness analysis
- Fast SLC generation

Additional Features:

- Surface selection & mesh editing
- Boolean operations
- Lattice infill & drainage hole
- Fast 2D nesting
- SLC to STL conversion / CAD import

Aakar

Reduce Gold weight in minutes!

Standout features:

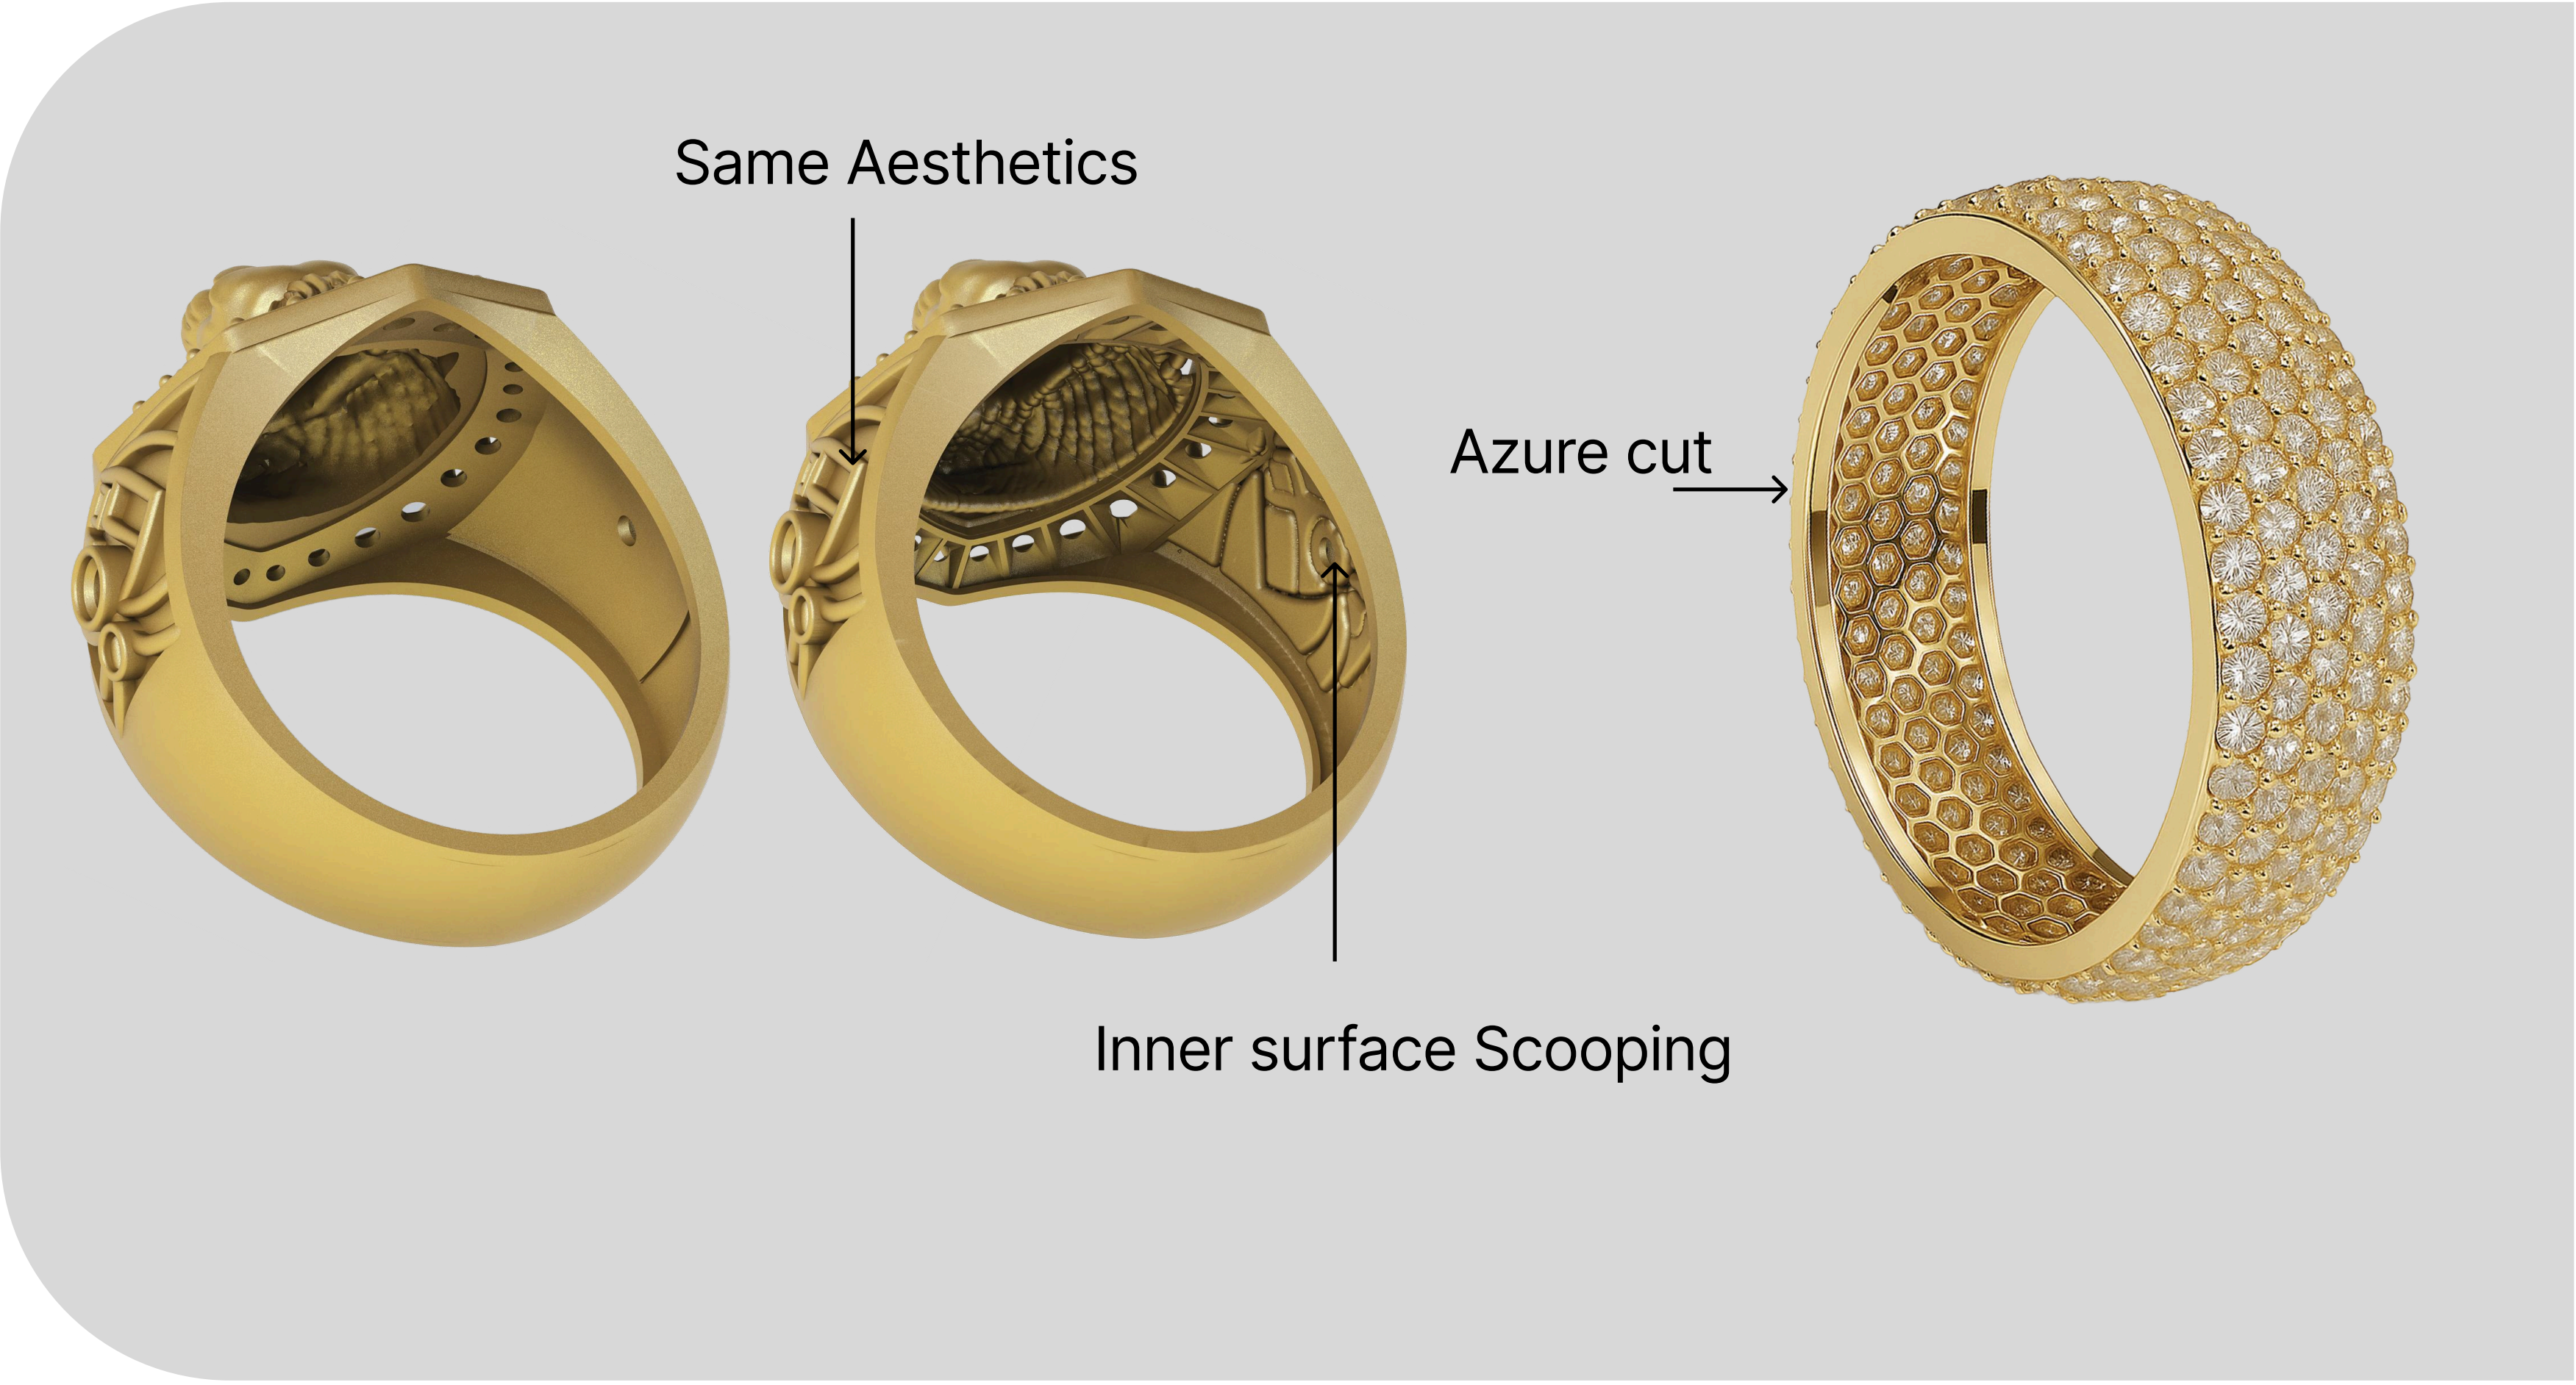

(i) **Auto Azure** - Reduces **10-15%**

- Automatically creates hex cutouts, saving time on manual adjustments after operation

(ii) **Auto scooping** - Reduces weight **20-30%**

- Helps maintain minimum thickness

(ii) **Ring resizing** - Instantly achieve multiple sizes and copies in one go

Dravya

Features

- Automate sprue location, shape & quantity
- Automatic generation of casting structure

Benefits

- ✓ Increase in casting yield
From under **30%** to over **70%**
- ✓ Limit shrinkage porosity
- ✓ Reduce labor requirements in tree making & planning
